Databases, search engines and instrument citations
Citation searching of included studies
Identification
Screening
Included
Records identified (n = 7,885):
PubMed (n = 480)
Europe PMC (n = 527)
OpenAlex (n = 1,136)
Semantic Scholar (n = 791)
Citations of instrument papers (OpenAlex) (n = 1,500)
SciELO (n = 7)
DataCite (n = 331)
OpenAIRE (n = 1,098)
CORE (n = 1,615)
Google Scholar (n = 400)
Records removed before screening:
Duplicate records (n = 6,315)
Removed by automation tools
(non−study records, n = 62)
Records identified from citation
searching of included studies
(not in the database set; n = 1,915)
Records screened
(n = 1,508)
Records excluded
(n = 968)
Records not sought: no condition term
in title, abstract or OpenAlex
full text (n = 1,775)
Reports sought for retrieval
(n = 540)
Reports not retrieved
(no open−access full text; n = 293)
Reports sought for retrieval
(n = 140)
Reports not retrieved
(no open−access full text; n = 28)
Reports assessed for eligibility
(n = 247)
Reports excluded (n = 128):
Recruited for misophonia or sound sensitivity (n = 61)
No number of cases with a denominator (n = 51)
Design (review, case report, qualitative) (n = 7)
Other (n = 4)
No misophonia−specific measure (n = 4)
Not about misophonia (n = 1)
Reports assessed for eligibility
(n = 112)
Reports excluded (n = 111):
Recruited for misophonia or sound sensitivity (n = 1)
No misophonia−specific measure (n = 19)
Design (review, case report, qualitative) (n = 41)
No number of cases with a denominator (n = 1)
Not about misophonia (n = 49)
Studies included in review (n = 96)
Independent samples (n = 125)
Reports of included studies (n = 120)
